Customer Reviews

My little guy will be starting Pre-K in the fall so I ordered this book for added practice. While it's a fantastic book it was a little too easy for him. It does say for ages 3+ and I think it would be better for a 3 year old that is just starting to learn number recognition and counting. We still used this book and enjoyed it. I always tell them repetition is the key to learning. :)**I was sent this product in exchange for a honest review. The opinions above are my own.**

I love this educational series. Use it to supplement my son's homework and at church to keep him occupied. He seems to not mind when I give him a variety of projects from the series.

really nice and fun activities! exceelant for 3 year olds-cutting on each page! fun fun!

Excellent!
