Detailed interviews from seven top online entrepreneurs and advice they give on how to create video courses, success on Youtube, publishing on , blog creating, and creating app products. The interviews are in depth and give readers great inside knowledge from some of the best. 4. Developing the entrepreneur mindset 5. And, a very useful list of resources at the end of the book! One of the big bonuses with this book is, the free giveaway in which the author personally interviewed seven big name entrepreneurs. A great bonus giveaway! A great book for starting your own home business. Take it from someone who has spent the past year working to start my own home business but not knowing which way to go, I wish I had this book a year ago. She has taken all the same information that it took me months to find and put it all in one place. From blogging to podcasting, kindle books to selling on , she goes over it all. I was so impressed by the amount of star power all packed into one book. She has interviews with all the people I have been following. From Nick Loper, John Lee Dumas, Steve Scott the list goes on and on. And the best part is she gives you access to watch all the interviews for free as a bonus for buying the book. I love that she is not only talking about starting a home business, but she is doing it. She is an inspiration and I look forward to more from her in the future

This book will have you dancing all the way to your boss's door with your resignation letter. Thorough and practical it walks you through the necessary steps to quit working for others by fulfilling a passion that will earn an income. It starts by helping you identify your area of interest, assess its potential, develop expertise and launch yourself online. Whatever your internet-employment dream the Job Escape Plan will help you achieve it.

There are many books on how to quit your job and start your own business. What stands out for me in this one, is the strong focus on helping the reader discover what they really want and what the perfect niche is for them. It also deals with all the typical excuses that hold us back, and then proceeds with some great interviews of real people who have already succeeded. A great book of resources for anyone keen to escape their job and create a different lifestyle.

It's such an amazing book for people who are still stuck with a day job. The world is changing and it's time for us to change as well. temporary staffing is overtaking the traditional day jobs. this book will give you the inspiration to go for it and the action plan to make it happen. I loved that Ramachandran had suggestions for a wide variety of Internet-based entrepreneur opportunities. It's very helpful for someone who is serious with starting a home based business just for anyone looking to make a change, start a side career, or open a new business. There's lots of advice out here on this, so it's easy to find other alternatives, but I liked this one because it's short and sweet. It offers all the info I would need in a compact package!
